**Women’s Health Support** – Vitalité, Éternel

As people ask you to help them with a need, we need to share the information & resources provided by Three from Dr. Dan Gubler and the scientific board, as we cannot diagnose nor prescribe. We can offer suggestions on what products “could” be beneficial to them, but we cannot make any guarantees. Please encourage them to review the information you send them, so they can decide on what they feel will be beneficial to them. Share the corporate product videos, flyers, and PDR listings, and individual product pdfs; they are loaded with information and facts, plus the disclaimer regarding FDA! Everyone should check with their physician before starting a new dietary supplement program!
